AI DIGITAL SOCIETY · FREE BEGINNER GUIDE

Start your AI business *without showing your face.*

Never used AI? Not sure what to sign up for, what to download or what to type? **I walk you through the very first click, with pictures,** until your first 7 posts are written and scheduled.

For anyone starting from zero

You need a computer and an email

Time one afternoon

By Josée Bédard

THE REAL PROBLEM

you want to start. *You just do not know where.*

You have heard that AI can help you build an online business without ever showing your face. Maybe you even tried. Then you hit a wall.

"Where do I even sign in?"

There are a lot of sites. Which one is real?

"What do I download?"

And how do I put it on my computer without breaking it?

"Do I have to pay?"

And what happens if I pick the wrong plan?

"What do I type?"

You stare at an empty box and nothing comes.

That wall is the only thing between you and your first week of content. It is not about being smart. Nobody shows you the first ten minutes.

WHAT THIS GUIDE DOES

It takes you from "I have nothing" to "my first seven posts are scheduled and will publish themselves". We start with the very first click, and I show you pictures of what to look for. By the last page you will have:

- Claude on your computer, signed in and ready
- A clear idea of whether you need a paid plan, and why
- A page topic and a promise, in one sentence
- Seven posts written in your own style
- Those seven posts scheduled to go out by themselves

ABOUT ME

i have not had a job *in over 17 years.*

Hi, I'm Josée. For more than 17 years I have run my own businesses, full time. No boss. No job to go back to. Just me, building things online.

Over those years I built my own digital products and affiliate offers. Over 30,000 products sold. A top 3% affiliate. A Facebook community of 140K.

I also made the mistakes. I tried schemes that earned nothing. I ran a marketing agency on 80-hour weeks, until my body said stop.

So I rebuilt quietly, with no face on camera and no staff. I built AI helpers that do the work, and it is the best work life I have had.

17+	30,000+	Top 3%
years working for myself, full time	products sold	affiliate

That is why this guide is so simple. I am not a teacher who read about it. I do this every week, and I wrote down exactly how.

START HERE

first, the words *nobody explains.*

You will see four words in this guide. Here is what each one means, in plain talk.

Faceless page

A Facebook page about a topic, not about your face. Nobody sees you. People follow it because the posts help them.

Claude

A helper you type to. You say what you want, and it writes back. Think of a very patient friend who is great with words. You find it at claude.ai.

Prompt

The message you type to Claude. That is all it is. In this guide you copy mine, change the words in [brackets], and press enter.

Blotato

A tool that posts for you. You give it your posts and pick the day and time. It publishes while you live your life. Like an alarm clock, but for posts.

the whole idea, in *three lines*

1

You show Claude a few posts you like.

2

Claude writes seven posts for you, in that style.

3

Blotato posts one a day. You do nothing.

WHAT THIS GUIDE IS, AND IS NOT

This is a method, not a promise. I do not share income numbers, and your results depend on your topic, your consistency and your offers. Everything here is about building a reliable content habit.

STEP 0 · WHERE TO SIGN IN

claude lives *in one place.*

Claude is the helper that writes your posts. There is exactly one real address for it. Type it yourself, so you never land on a copy.

claude.ai

1 **Open your web browser**

A browser is the program you use to look at websites. It is called Chrome, Safari, Edge or Firefox. Click the icon you always use. It opens a window with a long box at the very top.

2 **Type the address in that long box**

That long box is called the address bar. Click inside it, type **claude.ai** and press the Enter key on your keyboard. Do not use a search to find it. Typing it is safer.

WATCH OUT

Only ever sign in on **claude.ai** or inside the official Claude app. Never type your password into a link someone sends you.

STEP 0 · CREATE YOUR ACCOUNT

make your account. *It takes five minutes.*

3

Choose how to sign up

You will see a sign-up page with two main choices. Pick the one that is easiest for you:

1. **Continue with Google** if you have a Google or Gmail account. It is one click, and there is no new password to remember.
2. **Your email** if you prefer. Type your email address and click Continue.

4

Check your email for the code

If you used your email, Claude sends you a short code or a link. Open your email in a new window. Copy the code and type it in, or click the link.

Nothing arrived after two minutes? Look in your **Spam** or **Junk** folder. It is often hiding there.

5

Answer the few questions

Claude asks a few simple questions, like your name. Answer them honestly and click Continue. There are no trick questions.

✓

You know it worked when...

You see a big empty box where you can type, and a way to start a new chat. That is Claude. You are in.

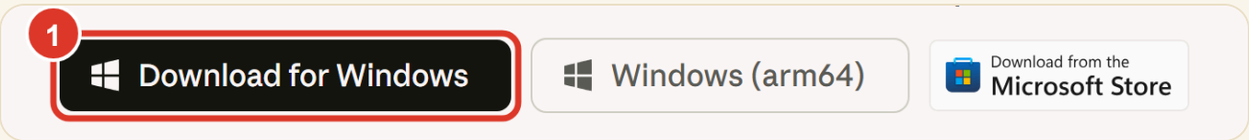

KEEP YOUR LOGIN SAFE

Write your email and password in a notebook you keep at home. Do not save them in a note on your phone that anyone can open. You will use them again in the next step.

STEP 0 · PUT CLAUDE ON YOUR COMPUTER

download the app. *It takes two minutes.*

You can use Claude in your browser, but the app is better. It is one click away from your desktop, and it can work with the files in your folders. Your chats stay the same in both.

The page at **claude.com/download**. Click the big black button (1).

1 **Go to claude.com/download**

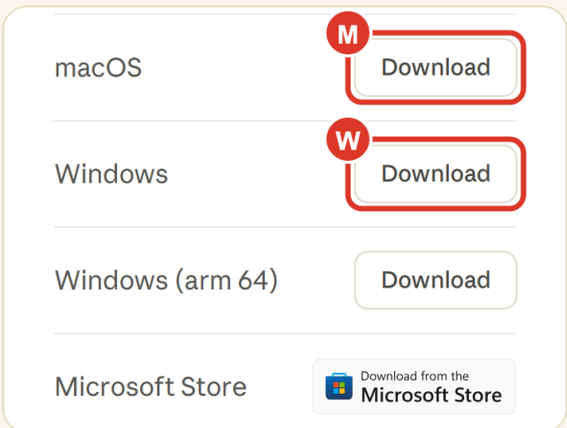

Type that address in the address bar, like you did before. The page already shows the right button for your computer. On Windows, click **Download for Windows**.

2 **On a Mac?**

Scroll down a little. In the list, click the **Download** button next to **macOS** (M).

3 **Wait for it to finish**

A small bar shows the file coming in. When it is done, the file is on your computer.

The list of downloads. **W** is Windows. **M** is Mac.

STEP 0 · INSTALL IT

open the file. *Claude installs itself.*

4

Find the file you just downloaded

Your browser shows it at the top or bottom of the window. Click it. If you cannot see it, here is where to look:

1. **Windows:** click the yellow folder icon on the bottom bar (File Explorer), then click **Downloads** on the left.
2. **Mac:** click the **Downloads** folder at the right end of the bottom bar (the Dock).

5

Install it

On Windows: double-click the file. If it asks "Do you want to allow this app to make changes?", click Yes. Wait a minute. Claude opens by itself.

On a Mac: double-click the file. A small window opens. Drag the Claude icon onto the Applications folder next to it. Then open Claude from your Applications folder.

6

Sign in inside the app

Claude opens and asks you to sign in. Use the same way you signed up: Google, or the same email. Then you see the big empty box again. That is the whole app.

✓

Make it easy to find next time

Windows: click the Start button, find Claude, right-click it and choose Pin to taskbar. Mac: with Claude open, right-click its icon in the Dock and choose Options, then Keep in Dock.

GOOD TO KNOW

The Claude app works on the free plan too. You do not have to pay to install it.

STUCK?

Type your question into Claude itself, like "How do I find my Downloads folder on a Mac?" It walks you through it. That is what it is for.

STEP 0 · FREE OR PAID?

what you get *on each plan.*

You can start for free. I did. Here is the honest picture, so you can decide for yourself.

Claude's plans page at **claude.com/pricing**. The names are Free and Pro.

Free plan

GOOD FOR TRYING IT OUT

- Install the app and chat with Claude
- Write posts, one at a time
- A small amount of room each day, so you may run out in the middle of a job
- Fewer extras

Paid plan (Pro)

GOOD FOR BUILDING EVERY WEEK

- **More room to work**, so you can build a whole week in one sitting without being cut off
- Unlimited Projects, to keep each page's rules in one place
- Research, to dig into a topic for you
- Claude in Chrome, so Claude can click around websites for you

STEP 0 · FREE OR PAID?

so why does a paid plan *matter?*

Building seven posts is not one tiny question. It is a real working session.

1

You do not get cut off

On the free plan, Claude can stop part way through a job and tell you to come back later. That is the number one reason beginners give up in the middle of week one. A paid plan gives you more room, so one sitting is enough.

2

Your rules stay in one place

Projects let you keep each page's rules and examples together, so Claude remembers them every time you come back. The free plan allows only a few. The paid plan does not limit you.

3

It unlocks the tools you grow into

Research, and Claude in Chrome, which can click around websites for you, come with the paid plan. They are the tools the full system uses for pictures, Reels and automatic posting.

MY ADVICE

Do this first week on the free plan if you are not sure. If you run out of room, or you already know you are serious, upgrade. You can see the current plans and prices at **claude.com/pricing**, because they change.

HOW TO UPGRADE, WHEN YOU ARE READY

Open Claude, click your name in the corner, and look for the plans or upgrade option. Pick Pro, enter your payment details on Claude's own page, and you are done. Never enter payment details anywhere else.

STEP 0 · THE LAST BITS OF SETUP

three small things. *You cannot break anything.*

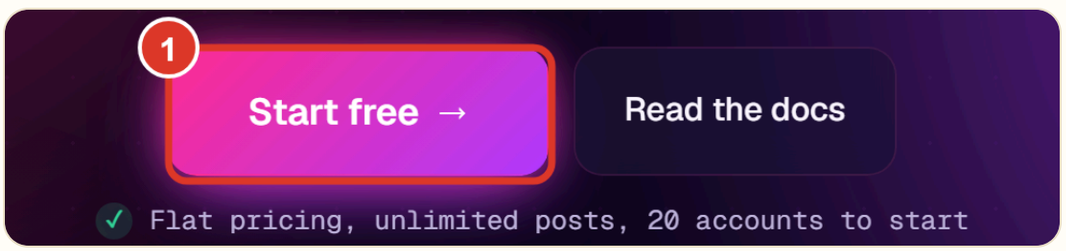

Do these once. After this, you never do them again.

A Make a folder for your week

1. Go to your desktop (the screen you see when you turn on your computer).
2. Right-click on an empty spot. Choose New, then Folder.
3. Type the name FIRST WEEK and press enter. Everything you make goes in here.

B Open Blotato

1. Go to **blotato.com/?ref=josee** and make an account.
2. Check Blotato's current plans before you pick one.

Blotato's home page at **blotato.com**. Click Start free (1).

That is my affiliate link. If you sign up through it, I may earn a commission, at no extra cost to you.

C Have a Facebook page ready

1. Already have a page? Skip this.
2. If not: on Facebook open the menu, click Pages, then Create new page. Pick a name about your topic, not about you.

IF YOU GET STUCK

Type your question into Claude, like "How do I make a folder on a Mac?" It will walk you through it. That is what it is for.

pick your topic. *Save five posts.*

1 Pick one topic and one promise

A good page is about one thing, for one kind of person. Finish this sentence on a piece of paper:

"I help [WHO] [GET WHAT] without [PROBLEM]."

> "I help busy parents plan cheap dinners without spending hours on it."

> "I help beginners grow their first garden without feeling lost."

> "I help people save money without giving up the things they love."

Do not overthink it. You can change it later. This sentence is your page's promise, and every post will serve it.

2 Save 5 posts you like

This is the most important step. Claude writes best when it can see what "good" looks like to you.

1. Open Facebook. Type your topic in the search bar and look at the pages that come up.
2. When a post makes you stop scrolling, take a picture of your screen. On Windows press the Windows key + Shift + S. On a Mac press Command + Shift + 4.
3. Do this until you have five. Drop them in your FIRST WEEK folder.

You are not copying their words. You are showing Claude the shape: how a post starts, how long it is, how it ends.

NO PICTURES NEEDED

You can also copy the text of five posts and paste it into a note. Claude can read both.

teach Claude *how you write.*

3 Make your rules page

A rules page is one short page that tells Claude who you are and how you sound. With it, every post sounds like you, not like a robot.

1. In claude.ai, click New chat.
2. Copy the box below. Click the typing box and paste (Ctrl + V on Windows, Command + V on a Mac).
3. Change the words in [brackets]. Paste your five posts at the bottom.
4. Press enter and wait a few seconds.

PROMPT 1 · WRITE MY RULES PAGE

```
I run a faceless Facebook page called [PAGE NAME].
My promise is: I help [WHO] [GET WHAT] without [PROBLEM].

I will paste 5 posts I like. Study them and write me a
one-page rules page I can copy, covering:
- my voice (words I use, words I never use)
- how my posts start, how long they are, how they end
- what I never say (no income claims, no promises)
- the one thing I ask people to do at the end

Use simple words. Keep it short enough to read in
two minutes.

[PASTE YOUR 5 POSTS HERE]
```

what claude writes back, *and how to save it.*

A few seconds after you press enter, Claude writes your rules page on the screen. Here is what one can look like. This one is only an example for a beginner gardening page. Yours will use your own topic and your own five posts.

EXAMPLE ONLY **RULES · Beginner garden page**

Voice: Warm and simple, like a neighbor talking over the fence. Short sentences. Words I use: easy, simple, try, small. Words I never use: hack, secret, guaranteed.

How posts start: One friendly question, or one small surprising fact.

Length: Four to six short lines.

How posts end: One small thing to try today, then a question for the reader.

Never say: Anything about making money. Any promise of results. Any medical advice.

What I ask people to do: "Save this for your next free Saturday."

✓

Read it. Fix it by talking.

If something does not sound like you, just tell Claude, like "make it warmer" or "shorter sentences". It fixes it right away. You can do this as many times as you like.

✓

Save it in your folder

1. Click and drag your mouse over all of Claude's rules page, or press Ctrl + A on Windows or Command + A on a Mac.
2. Copy it: Ctrl + C on Windows, Command + C on a Mac.
3. Open Notepad (Windows) or TextEdit (Mac), and paste: Ctrl + V or Command + V.
4. Save it in your FIRST WEEK folder with the name RULES.

THE 5 STEPS · STEP 4

claude writes *your whole week.*

4

Ask for seven posts

Start with text posts only. They are the quickest to make and the easiest to check.

1. In claude.ai, click New chat again.
2. Copy the box below and paste it in.
3. Under it, paste your rules page from your RULES file.
4. Press enter. In a few seconds you get seven posts.

PROMPT 2 · WRITE MY FIRST WEEK

```
Here are my rules for my Facebook page. Follow them.

Write 7 text posts, one for each day of next week,
Monday to Sunday. Match the shape of the posts I
showed you. Use simple words.

For each post give me:
- the post text
- one first comment to add under it

Use a different angle every day. Never repeat a hook.

[PASTE YOUR RULES PAGE HERE]
```

EXAMPLE ONLY · GARDENING PAGE

DAY 1 **Post**

Your first garden does not need a big yard. It needs one pot, one sunny spot and one plant you actually like to eat.
Try this today: pick one herb. Basil is a forgiving first plant.
Which herb would you grow first?

First comment

Not sure what to pick? Tell me what you cook most and I will suggest one.

Read all seven. If one is off, tell Claude what is wrong, like "shorter". Then copy all seven into one file called WEEK 1 in your folder.

THE 5 STEPS · STEP 5

blotato posts them. *You live your life.*

5

Schedule your seven posts

Scheduling means you pick the day and time, and Blotato posts it for you at that moment, even if you are asleep.

1. Open Blotato and log in.
2. Connect your Facebook page. Blotato walks you through it on screen, one click at a time. You only do this once.
3. Click the button to create a new post.
4. Paste Day 1's text. Pick the day and time. Save.
5. Do the same for days 2 to 7. That is seven small copy and pastes.

THEN DO ALMOST NOTHING

Each day your post goes up by itself. Add the first comment under it, which takes ten seconds. Answer people who comment. That is the whole job.

WANT IT EVEN SIMPLER LATER?

Once you are comfortable, you can connect Blotato to Claude so Claude schedules the posts for you. That, plus pictures and Reels, is in the full system on the last page.

before you press save, *check this*

- [ ] I read all seven posts and they sound like me.
- [ ] No post promises money or results.
- [ ] Every post has a first comment ready.
- [ ] Each post is set for the right day and time.

COMMON QUESTIONS

quick *answers.*

Do I have to show my face?

No. Everything here is words. Later you can add pictures and Reels, still without a face.

I have never used anything like Claude. Will I mess it up?

No. You type, it answers. If you do not like an answer, say so and it tries again. You cannot break it.

What if the posts do not sound like me?

Add more examples, tell Claude what is off, and ask again. It gets better every week.

How many posts a day should I start with?

One. Add more only when the first week feels easy.

Can I do this for more than one page?

Yes, but start with one. The full system shows how to run several from the same session.

Is Claude safe to use?

Do not type private things like passwords or bank details into any chat. Your posts and rules page do not need them.

> YOU DID IT
>
> If you finished the five steps, you have a page, a promise, a rules page and a week of posts that publish themselves. Most people never get this far. Take a minute to be proud of that.

© Josée Bédard, AI Digital Society. This guide describes a working method. It is not a guarantee of results, and it contains no income claims. Check each tool's current terms and plans before you start.

WHAT COMES NEXT

ready to build *the whole machine?*

This guide gets your first week posted. **The Faceless Content System** is the exact system I use to do it every week, with Claude doing about 90% of the work:

- A brain file: Claude interviews you once, so every post sounds like you
- A page launch kit: names, bio, logo and cover, made by Claude
- Pictures and Reels, not just text, with no face
- A waiting room, so weeks of posts are ready before you need them
- Comment words that send your links by message
- A board that shows every page and every day at a glance
- A bonus Claude skill, and weekly backups so nothing is lost

See the Faceless Content System

You can do this whole guide first. When you are ready for more, it is waiting.
